

The traffic report that XM provides me is invaluable. For years I have been frustrated by the traffic reports offered by the local newsradio. They advertize that it is every 6 minutes, but when they come on they talk about only a couple of freeways each segment. Do you know how many freeways and interchanges L.A. has? I have to listen to the same station for at least a half an hour before the station talks about my route, and then the information is usually old news. XM provides updated and accurate traffic reporting. Please leave XM, and my rights to listen to any station that I want, alone.
